

PRESS RELEASE 2024-05-07

Northcom Partners with Peplink and Starlink to Deliver Advanced Connectivity Solutions

Northcom is proud to announce its new status as an Authorized Peplink & Starlink Solution Provider. This partnership enables Northcom to offer enhanced Internet connectivity solutions by integrating Peplink's SD-WAN technology with the high-speed, low Earth orbit (LEO) satellite Internet services from Starlink. This initiative aims to provide reliable Internet access for businesses in challenging locations.

Peplink, recognized for its patented technology that ensures unbreakable connectivity, has recently signed an agreement with SpaceX's Starlink to become an Authorized Technology Provider. This partnership leverages the strengths of the Starlink Flat High-Performance and Peplink's advanced SD-WAN routers to offer a joint solution that addresses the critical need for reliable, fast, and cost-effective Internet globally. "Our combined solution gives any business access to affordable, fast and reliable Internet bandwidth globally." Says Alex Chan, CEO and founder of Peplink,

Northcom, known for delivering critical communication solutions across the Nordic region, is expanding its service range by incorporating these technologies. This enhancement is expected to support a wide variety of industries, such as industrial and maritime operations, remote businesses, and energy sectors, by improving their connectivity capabilities.

"As a trusted partner of Peplink and now a proud member of the Authorized Peplink & Starlink Solution Providers, Northcom is excited to expand our portfolio and bring these high-speed LEO Starlink solutions integrated with Peplink's SD-WAN technologies to our clients. This move aligns with Northcom's commitment to leverage the latest technologies to meet customer demands for efficient and reliable communication solutions, especially in remote and demanding environments." Says Robin Blomquist, Group CTO of Northcom.
